

CDM CDMF

60Hz
Light Vertical
Multistage
Centrifugal Pump

Stock code:300145

Pumping Water Pumping Honor

Company profile

Founded in 1991, CNP has been listed on Shenzhen Stock Exchange on 9th December, 2010; Stock name: CNP; Stock code: 300145

In 2017, CNP's annual output has exceeded 700,000 units/set, with sales over 2 billion, and continues to grow at a double-digit annual rate. CNP has a national-level enterprise technology center, launched ultra-high efficient, new generation CDM (F) light vertical multi-stage centrifugal pump in 2017. All series of light stainless steel pump products grow stably. Advanced frequency conversion water supply equipment has been innovated to the 6th generation. Fire pump and diesel engine have obtained UL certification. TD in-line pump, NIS/ NISO end suction pump, NSC split casing pump, WQ sewage pump, metering pump, oil pump and other pump products, can meet various application needs of different fields.

With over 300 domestic offices and foreign agents, CNP has a complete network of marketing services to meet the requirements of overseas and domestic needs. The products have been widely applied in the area of pressurization, industry, living water, cycling of air-conditioning water, heat supply, fire extinguishing system, pumping of underground water, treatment of sewage and waste water, chemical industry and desalination of sea water, etc.

CNP, a green water expert beside you.

Summary

CDM/CDMF pumps are new generation, high efficiency, non-self-priming vertical multistage centrifugal pumps (Abbr. as pumps). It referred European standard, used entirely new industrial design. It is energy saving, low noise, environment friendly, compact design, beautiful shape, light, easy for service, high reliability.

Motor

Totally enclosed, fan cooled, 2 pole standard motor
IP class: IP55

Insulation class: F

Voltage: 60Hz: 3×200-230/346-400V
 3×200-255/380-440V
 3×220-277/380-485V

Working conditions

Thin, clean, non-flammable, non-explosive, solid free, fiber free, physically and chemically water-like liquid.

Liquid temperature:

Normal temperature type: -15°C to 70°C

Hot water type: -15°C to 120°C

Ambient temperature: up to +40°C

Altitude: up to 1000m

Application

CDM/CDMF pumps are designed for a variety of applications from the pumping of potable water to the pumping of industrial liquids. Applied for liquids of different temperature, different rated flow, different pressure range. CDM is suitable for non-corrosive liquid, CDMF is suitable for light corrosive liquid.

Boosting: Filtering and transferring water in water factories, delivering water in different zone, pressuring for major pipelines, boosting for high buildings.

Pressuring: Water circulating system, washing system, high pressure flushing system, fire-fighting system.

HVAC: Air condition system

Water treatment: Ultrafiltration system, R/O system, distillation system, separator, swimming pool.

Performance curve

Following conditions are suitable for performance curve below.

1. All curves are based on the measured values of 60Hz; constant motor speed 3500rpm or 3540rpm.

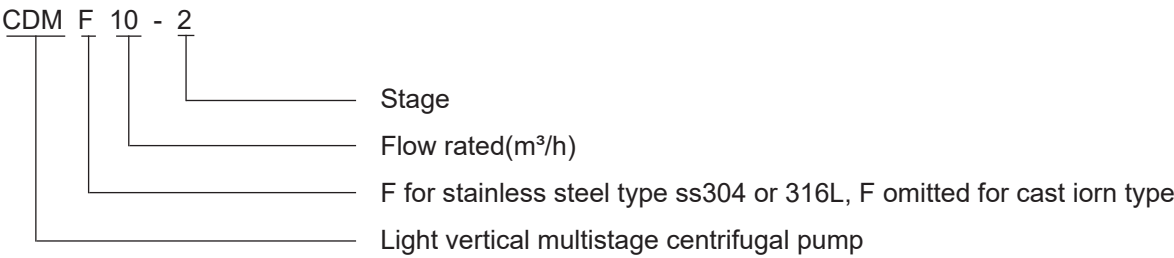

2. Curve tolerance in conformity with ISO9906:2012, Grade 3B.

3. Measurement is done with 20°C air-free water, kinematic viscosity of 1mm²/sec.

4. The operation of pump shall refer to the performance region indicated by the thickened curve to prevent overheating due to too small flow rate or overload of motor due to too large flow rate.

()Need to specify especially.

Max ambient temperature, altitude above sea level

When pumps working in the condition of higher than 40°C or higher than 1000m altitude, because the air density lessened, cooling performance is reduced, motor output power P_2 is reduced also. The motor power shall be enlarged in those working conditions.

Min.inlet pressure

In case that the pressure in pump is lower than the steam pressure used to convey liquid, the cavitations will occur. To avoid cavitations, a minimum pressure at the inlet side of the pump shall be guaranteed. The maximum suction stroke can be calculated with following formula:

$$H = P_b \times 10.2 - NPSH - H_f - H_v - H_s$$

P_b = Barometric pressure in bar.

(Barometric pressure can be set to 1 bar).

In a closed system, P_b means system pressure [bar].

NPSH = Net Positive Suction Head [m].

(It can be read from the point of possible max. flow rate shown on NPSH curve.)

H_f = Pipe friction loss at the inlet [m].

H_v = Vapour pressure [m].

H_s = Safety margin = minimum 0.5 meters head.

If the "H" calculated is positive, the pump may run under the max. suction stroke H.

If the "H" calculated is negative, A head of minimum inlet pressure H is required.

CDM/CDMF 1 Installation sketch

Note1: CDM/CDMF1-19~1-29 have no oval flange pipeline connection.
 Note2: The overall dimensions of the single-phase motor and explosive-proof motor are a little different. Please contact us for details.

Dimensions and weights

Model	Dimension (mm)					Weight(kg)
